

Acronis[★] SCS

About Us

Acronis SCS is an American cyber protection and edge data security company dedicated to delivering products designed to meet the unique requirements of the U.S. Public Sector. The company's innovative backup, anti-ransomware, disaster recovery, and enterprise file sync and share products ensure data security across federal, state and local government, education, and non-profit computing environments. Acronis SCS products are built and supported in the United States by US citizens and validated by US-based third-party agencies.

Our Mission

To guarantee U.S. Public Sector operational assurance through reliable and trusted cyber protection and edge data security technology.

Product Features

★ Data Protection

Acronis SCS provides secure, reliable, critical data protection across physical, virtual, and cloud environments of any scale. Keep every bit of your data protected no matter what technology you onboard or the amount of data you generate.

★ File Sharing

We provide secure access to files and content across the entire enterprise network using certified FIPS 140-2 encryption and two-factor authentication via CAC/PIV card integration.

★ System Provisioning

Acronis SCS offers a fast and easy solution to help you deploy or reimage all laptops, desktops and servers simultaneously.
