

Introducing Acronis SCSVets[★]

Phoenix, AZ Cohort Attends Training

Our Mission

Drastically *reduce veteran and military spouse underemployment* and *eliminate America's cyber workforce shortage* by arming participants with the internationally-recognized credentials, skills, and resources they need to pursue self-sustaining cyber careers – at zero cost to them.

Our Unique Approach

Unlike other programs that prioritize online learning, *our unique, scalable, and high-touch program utilizes community-oriented partners to provide tailored, in-person cyber training and a comprehensive support system* that meet the needs of each state's veteran and military community.

Our students are prepared to excel in public and private sector organizations of all sizes, though our program is particularly beneficial for *small- and medium-sized businesses*, which are in critical need of qualified cyber talent, account for the majority of open US jobs, and often lack veteran-specific hiring programs.

Our Offerings

- **Cyber Certifications.** Our robust curriculum prepares participants to obtain stacked cyber certificates, including internationally-recognized CompTIA A+, CompTIA Network+, CompTIA Security+, Windows 10, and Acronis SCS credentials.
- **Career Skills Workshops and Social Services Support.** Participants have access to quarterly, in-person, civilian-led career skills workshops (covering everything from social media engagement to resumé building and mock interviews) and ongoing life skills resources and social services support.
- **Career Pipelines.** After obtaining the right certificates, participants are connected with cyber and tech employers from a diverse and growing pool of industry partners.

America's Need for Acronis SCSVets

With roughly 18.2 million veterans, 1.2 million active duty service members, 785,000 guard and reservists, and *more than 500,000 unfilled cybersecurity jobs*, America needs Acronis SCSVets programming.

How It Works

- **Pipeline.** We select participants interested in pursuing a cyber career, but lacking the credentials to do so successfully.
- **Funding.** We help participants explore existing funding avenues for certificate preparation courses and exam fees and cover any remaining costs.
- **Prep & Certification.** We enroll participants in tailored cyber bootcamps that prepare them to take and pass certificate exams and provide in-person, civilian-led workforce trainings.
- **Prep & Certification.** We connect participants with businesses actively looking to fill relevant cyber and tech roles.

Partner & Help Support Veterans
